JUNE
WEBINAR WEDNESDAY

The Story Behind the Standards –
How Fire Alarm Codes and Standards Are Developed, Enforced, and Evolved

---

June 3, 2026
12:00pm - 1:00pm EDT
Cost:
$40 Member/Technicians
$60 Non Members

We Will Cover:

- A comprehensive overview of Codes and Standards
- How the CAN/ULC Fire Alarm Standards fit into the big picture
- How to integrate the Standards and enforce them via legislation

CFAA Registered Technicians can earn:
1 Category 1 Credit

REGISTER NOW

This webinar will provide a comprehensive overview of Codes and Standards, delving into their differences, the relationship between the two, how they are developed and adopted, and finally how the how the CAN/ULC Fire Alarm Standards (S524, S536, and S537) fit into this big picture. This session will help you understand why the Standards you work with every day are relevant and exactly how they are enforced via legislation.

Ever found the Standard's requirements to need improvement or revision? This session will also cover how you can get involved and stay involved with their development!

Our Speaker

Jessica Marano is a Code Consultant with LRI Engineering in Toronto. She holds an Advanced Diploma in Fire Protection Engineering Technology from Seneca Polytechnic and a Bachelor of Science in Fire Science and Emergency Management from the University of Cincinnati. Jessica brings five years of combined experience across the fire alarm and sprinkler service sectors, as well as in fire and life safety code consulting.

While completing her studies, Jessica founded two internship programs for fire protection students – initiatives created to strengthen student engagement, build confidence, and support career development for those taking their first steps into the industry.
